VIRGINIA RACING COMMISSION

STATE CORPORATION COMMISSION
TYLER BUILDING
COURTROOM B
1300 EAST MAIN STREET
RICHMOND, VA 23219

Wednesday, May 22, 2019 at 10:00 a.m.

COMMISSION MEMBERS:
D.G. Van Clief, Jr., Chairman
Stuart Siegel, Vice Chairman
J. Sargeant Reynolds, Jr.
I. Clinton Miller
Stephanie B. Nixon

COMMISSION STAFF:
David S. Lermond, Jr., Executive Secretary
Kimberly C. Mackey, Business Manager
Rhonda Davis, Pari-Mutuel Wagering and Licensing Coordinator

ATTORNEY GENERAL'S OFFICE:
Robert N. Drewry, Esquire

CAPITOL REPORTING, INC.
REGISTERED PROFESSIONAL REPORTERS
(804) 788-4917
1. Call to Order
2. Approval of the February 14th meeting minutes
3. Public Comment Period
4. New Business
   a. Request for Approval of Final Amendments to Chapter 50 (Racing Officials)
   b. Request for Approval of Final Amendments to Chapter 80 (Commission Veterinarian)
   c. Request for Approval of Final Amendments to Chapter 140 (Flat Racing)
   d. Request for Approval of Final Amendments to Chapter 180 (Medication)
   e. Request for Approval of Thoroughbred Expenditures from the Virginia Breeders Fund
   f. Request for Approval of Licenses for a Satellite Wagering Facility and to Conduct Pari-Mutuel Wagering on Historical Horse Racing at Rosie's Richmond, Submitted by the Colonial Downs Group, LLC
   g. Presentation from J. Curtis Linnell, Executive Vice President of the Thoroughbred Racing and Protective Bureau
   h. Presentation by Joe Rudisill, HHR Compliance Specialist for the Virginia Racing Commission
5. Commissioners' Comments
6. Closed Session (If necessary)
7. Adjournment
CHAIRMAN VAN CLIEF: Good morning, everybody. My watch says ten o'clock, so I would like to convene this morning's meeting of the Virginia Racing Commission. Thank you all for taking time to join us. The meeting is hereby called to order.

Our first order of business is for the commissioners to consider approval of the February 14 meeting minutes. I've got one quick change before I ask everybody else their opinion on these. On Page Two, Mr. Lermond, if we can do this. These meetings are in your packet, by the way, under Tab One.

Page Two, second paragraph from the top which reads: Vice Chairman Siegel moved to approve the 2019 Virginia Gold Cup racing officials, seconded by Commissioner Miller. All were in favor with the vote of -- Commissioner Reynolds pointed out that should be four-zero, not three-zero.

I'd like to add some additional wording to indicate that our motion that day included a proviso which allowed the executive secretary to complete additions to the list as might be necessary and requested by the Gold Cup. So if you can add that wording, then the minutes look
good to me.

Anybody else? No other changes? Okay. I
would move with that change we approve the
February 14 meeting minutes.

COMMISSIONER REYNOLDS: So moved.

COMMISSIONER SIEGEL: Second.

CHAIRMAN VAN CLIEF: Thank you. Any opposed?
The motion carries unanimously.

As usual, we'll go to public comments at this
point. As you know, a couple meetings ago, we
moved the public comment period from the end of
the meeting up to the top, the thought being that
individuals who wanted to join us who would like
to make comments about upcoming items we're
addressing for action today that they are welcome
to do so.

Would anybody like to make any comments about
our agenda today or any other topics that they
care to address? If you do, please state your
name for the record and please keep your comments
to a maximum of five minutes duration. Anybody?

Okay. Thank you very much.

Now we go to new business. We have four
amendments to our regulations that we want to make
to clean things up a bit. I don't think these are
going to be terribly controversial, but I would
like to take -- they are substantive enough so I'd
like to take each one individually and I will ask
our executive secretary, Mr. Lermond, to brief us.
Dave, would you start off with Item A?

MR. LERMOND: Thank you, Mr. Chairman. Over
the last year or two, things have come up where we
have figured out that at some point, we wanted to
just tweak or amend certain regulations and I kept
saying whenever I got a lull in the action I would
address that, but of course that hasn't happened
lately, but I think it's important that the
regulations going in to the Colonial Downs
inaugural meet be as updated and as accurate as
they can be.

So as Mr. Chairman said, most of these are
really housekeeping, but I will try to briefly go
through each chapter and explain why we're
requesting these amendments.

The first amendments are to Chapter 50, which
pertains to racing officials. You may recall back
in December, we changed our rules to allow for not
having the hard fast rule about fingerprinting
people every five years and to give some
discretion to the Commission as far as that goes.
Like our rule book has done to me in the past, there actually appeared in another section, and ironically it was the racing officials section, which is one of the reasons that we did this was because of the new rules patrol judges at the Gold Cup. That was one of the reasons we didn't feel like these people needed to be fingerprinted every five years. Oddly enough, we did not change this section.

The other part to this section deals with when the horse ID identifies horses entering the paddock, we wanted to include digital tattoo microchip or freeze brand number, two methods for identifying horses.

In the past, we've had microchipped horses that have come over from Europe years ago in the Virginia Derby and I think sometime in the steeplechase races, and a digital tattoo is something new that the Jockey Club is going to require all horses to have that are born after January 1, 2020 to have this digital tattoo, so I wanted to include all of those in there, again to be current.

If you have any questions about the digital tattoo, Curtis Linnell from the TRPB happens to be
with us today to speak on a different subject, but if you would like to hear anymore about it, I could ask Curtis to brief you on it or we can just move on.

COMMISSIONER SIEGEL: New technology.

MR. LERMOND: It is. It is. So those are the only two changes in Chapter 50, and unless any of the commissioners have any questions, I would seek a motion to approve these as final amendments to Chapter 50.

COMMISSIONER SIEGEL: So moved.

COMMISSIONER NIXON: Second.

CHAIRMAN VAN CLIEF: I've got one question for you, Dave. Just as a reminder, I think you briefed us on this when we made this change. While this change -- going back to the fingerprinting issue -- removes the five-year requirement, is it not our intent to require updated fingerprints from certain categories of employees more often than others?

MR. LERMOND: That's correct. Primarily, people that would handle money with the HHR or at the OTBs, managers of the OTBs, people working the cage, things like that. But the racing officials working at the Gold Cup is an example, of people
we really don't need to do every five years.

CHAIRMAN VAN CLIEF: Right, but those in
sensitive positions, you will count on and call up
and routinely do fingerprinting?

MR. LERMOND: Yes.

CHAIRMAN VAN CLIEF: Thank you. No further
questions from me. We have a motion. We have a
second. Is there any other discussion? If not, all in favor, please signify by saying aye.

NOTE: The Commission votes aye.

CHAIRMAN VAN CLIEF: Any opposed? Thank you.

MR. LERMOND: Okay. Behind Tab Three of your
notebooks, the proposed amendment to Chapter 80. These changes will allow the Commission
veterinarian to administer Lasix and perform
endoscopic examinations.

These changes are basically necessary to
accommodate the smaller race meets such as Shenandoah Downs where our Commission veterinarian
not only administers Lasix, but needs to be there
after the races in case a horse needs to be scoped and there aren't any other private vets available. That's all there is to Chapter 80.

Unless you have any questions, I would seek a
motion to approve this final amendment.
COMMISSIONER REYNOLDS: So moved.

COMMISSIONER SIEGEL: Second.

CHAIRMAN VAN CLIEF: Any discussions or questions? If not, please signify your approval by saying aye.

NOTE: The Commission votes aye.

CHAIRMAN VAN CLIEF: Any opposed? Thank you.

MR. LERMOND: Moving along to Chapter 140 under Tab Four. This is kind of an interesting one. Some of the commissioners may recall we had an appeal case several years ago about something that happened before the start at a steeplechase race and there was a lot of discussion about are they in the box, where is the box and all that.

I think one of the points that Mr. Petramalo brought up during that appeal is that the regulations really don't speak to what happens before the race.

The rule starts out with during the race, but we think that it's important enough that if something -- a horse interferes with another horse before the start and affects that horse's chances to win, that we should be able to enforce the interference rule against that horse as well, just like if it was in the running of the race.
You wouldn't have to deal with this at Thoroughbred races, of course, because they're in the gate so they would be a starter or a nonstarter.

In this case, I think this is a good rule to put in here. I spoke with Pete McGibney of the NSA and he helped me with the language and he said that the proper term would be "while under the starter's orders" and that's when they line them up and put them in the box and drop the flag. So I think this would be a good amendment for us to have.

Unless you have any questions, I seek a motion to approve this amendment as final to Chapter 140.

MR. PETRAMALO: Will I get footnote credit for this rule?

MR. LERMOND: I did. It was a good point.

COMMISSIONER MILLER: I vote we approve.

CHAIRMAN VAN CLIEF: We have a motion to approve.

COMMISSIONER NIXON: I'll second.

CHAIRMAN VAN CLIEF: We have a second, Commissioner Nixon. Any further questions or comments? If not, then please signify your approval by saying aye.
NOTE: The Commission votes aye.

CHAIRMAN VAN CLIEF: Any opposed? Thank you.

MR. LERMOND: Okay. The final chapter we'd like to get your approval for amending today is Chapter 180, which deals with medication. Some of the commissioners may be aware, but Dr. Harden, who has been with the Commission I think longer than anybody else, has decided to step back from his role as equine medical director, although he will still help us out just as a normal Commission vet, but Dr. Ada Caruthers, who is here today, has agreed to take on that role.

She has been working with Dr. Harden for the last two years learning as much as she can from Doc. She flew solo at the Gold Cup this May and did an excellent job. I think we had 100 percent collection, which is unbelievable. That's a credit to our people in the test barn as well. So I'm going to try and go through this, but if I get stuck, I'll ask Dr. Caruthers to bail me out.

The first change is we want to add to the definition of primary laboratory the phrase "accredited by the Racing Medication and Testing Consortium". This is something that all the Mid-Atlantic tracks agreed to do some years ago,
that they would agree that there would be third
party Lasix administration and labs would be
accredited by the RMTC. We followed that, but I
just thought it would be good to memorialize it
here in our regulations.

The same language is also added to the
definition of reference laboratory. That's the
laboratory someone would use if they wanted to
request a split sample and I think they should
both be accredited. It's important.

The next change is in Section 10-180-70. It
deals with Phenylbutazone and Flunixin and other
NSAIDs. I'm going to get hung up on the
pronunciation of these two, but there are two
other NSAIDs that are commonly used in horse
racing and the gist of this section is that you
cannot have more than one in a horse's system at
any one time. It's not good for the horse to have
them. It's called stacking is the term that's
used.

So we wanted to add those two NSAIDs to the
list of drugs that you cannot stack. We've
inserted quantifiable levels for those two and
that is all that has been changed in Section
10-180-70.
DR. CARUTHERS: Can I just add one thing?

MR. LERMOND: Yes.

DR. CARUTHERS: The Diclofenac is spelled incorrectly. We'll have to fix that.

MR. LERMOND: Okay. I can't even pronounce it. I can't spell it. The other noteworthy thing is that under the disciplinary actions, we are going to strike those because when a horse tests positive, the rules say that the stewards go to the ARCI guidelines and classification document and that's where they get the direction of what penalties to use.

So these penalties that are in here are not only outdated, but they don't correlate to the ARCI guidelines. Again, this is just really cleaning up a lot of things.

In the Section 10-180-100, we are adding the same language about identifying the horses. When a horse goes to the test barn, it is also identified by the test barn personnel to make sure that they're testing the correct horse and we want to add the same methods that we've added in the previous section; mainly the digital tattoo, microchip and the freeze brand number in the case of Standardbreds.
Am I doing okay so far, Ada?

DR. CARUTHERS: Yes.

MR. LERMOND: Okay. Under Section 10-180-110, laboratory findings and reports, we are going to add Paragraph Nine to Section F, and it reads: "Should the split sample not be tested by the reference laboratory due to any reason out of the Commission's control, then the stewards shall hear the case based on the results of the primary testing laboratory."

Some of you may remember years ago, we had a case where there was a mix-up with the shipment and some question as to why that happened. So other states have this same rule. I think it's a good one so if something happens to the split sample and it's not to any fault of the Commission, then we would fall back on the original test result.

Those are the amendments to Chapter 180. I'll be happy to answer any questions or I may throw them to Dr. Caruthers if I feel the need.

CHAIRMAN VAN CLIEF: One point on the use of the ARCI penalty guidelines. The stewards looking at those as guidelines are hard and fast rules?

MR. LERMOND: Our language says: "As a
starting point."

CHAIRMAN VAN CLIEF: Okay.

MR. LERMOND: We always want our stewards to have leeway based on mitigating or aggravating circumstances, but the fact that all the states start with the same point and then apply those exceptions, I think is good.

CHAIRMAN VAN CLIEF: I think these are appropriate. Okay. Thank you. Any other questions for Mr. Lermond? If not, we need a motion to approve the changes as set forth.

COMMISSIONER MILLER: So moved with the stipulation that the drug is spelled correctly.

MR. LERMOND: Thank you.

COMMISSIONER MILLER: Whatever drug it is.

COMMISSIONER SIEGEL: The first L is a C, for your information. The first L is a C in Diclofenac.

CHAIRMAN VAN CLIEF: With the change in spelling to correct the medication, we have a motion. We need a second.

COMMISSIONER NIXON: Second.

CHAIRMAN VAN CLIEF: Thank you. Any further discussion or questions? If not, please signify your approval by voting aye.
NOTE: The Commission votes aye.

CHAIRMAN VAN CLIEF: Are there any opposed?

Thank you very much. Dr. Caruthers, welcome to the Commission. We're delighted to have you.

DR. CARUTHERS: Thank you very much.

CHAIRMAN VAN CLIEF: Mr. Lermond, thank you.

MR. LERMOND: Thank you.

CHAIRMAN VAN CLIEF: Next order of business is to consider the request for approval of Thoroughbred expenditures from the Virginia Breeders Fund this year and Ms. Easter is here to address that, I believe.

MS. EASTER: Sure. We're just requesting that for all nine Virginia-bred stakes races that will be running at Colonial Downs, first off, we're very happy to have them back in Virginia, and that $10,000 of each $100,000 purse that's put up would come from the Breeders Fund, unless less than six Virginia-breds are entered and then the races would include certified horses and the HBPA will take care of the entire purse.

COMMISSIONER SIEGEL: Just a quick question.

MS. EASTER: Sure.

COMMISSIONER SIEGEL: Ten thousand on the first 100 or every 100?
MS. EASTER: On every 100. So a total of $90,000.

COMMISSIONER SIEGEL: So essentially ten percent.

MS. EASTER: Yes, sir.

MR. LERMOND: Up to 90,000, because as Debbie said, if a certified horse draws into one of these races, then the code of Virginia doesn't allow us to use Breeders Fund money to fund that race because the horses all have to be Virginia-breds in order for us to do that.

CHAIRMAN VAN CLIEF: Any other questions? If not, we need a motion to approve the request.

COMMISSIONER SIEGEL: So moved.

CHAIRMAN VAN CLIEF: Thank you. Second?

COMMISSIONER REYNOLDS: Second.

CHAIRMAN VAN CLIEF: Thank you. All in favor, signify by saying aye.

NOTE: The Commission votes aye.

CHAIRMAN VAN CLIEF: Any opposed? Thank you very much. Those expenditures are approved.

Next up is consideration for approval of licenses for a satellite wagering facility and to conduct Pari-Mutuel wagering of Historical Horse Racing at Rosie's Richmond. The application has
been submitted by Colonial Downs Group, and I
believe that Mr. Marshall is here to brief us on
this.

MR. GOMES: Good morning.

CHAIRMAN VAN CLIEF: Mr. Gomes. I'm sorry.

MR. GOMES: Great to see you all again. I'm
joined up here by John Marshall, our senior VP of
Operations, and Jamie Hartman, our VP of Finance.

We're privileged to stand before you today to
be heard on our application for a satellite
wagering facility for our Rosie's in Richmond.
Before that, I'd like to give you a brief update
on where we are, some key points from the other
facilities that we have opened.

So since we last met, we've had two successful
openings, one at the Rosie's in New Kent and one
at the Rosies in Vinton, and I think that we can
all attest that they were very successful openings
and at times we even have lines right now for
people to play the games. Vinton opening that
first Saturday, there were two or three people
waiting on some of the games.

I remember sitting before you the last meeting
and also being very proud to say that we had 50
employees at that point, and now I'm extremely
pleased to tell you that by June when we open Richmond, we'll have 745 employees on our team. By the summer when live racing starts, that number will climb to almost 900. That will be approximately $20 million in annual payroll.

So on this site, you see a map of the exact location of the Rosie's Richmond designated by the red star. It's just east of the Chippenham Parkway on Midlothian Turnpike and just yards outside of the Chesterfield County line. It's approximately a ten minute drive from downtown and we love the site due to the great highway access and ease of access from the western, northern and southern suburbs of Richmond.

We're already seeing other development sprout up around us and we fielded numerous calls for other entertainment concepts, restaurants and hotels to be on the adjacent land next to us.

On this slide, you can see the Rosie's Richmond at night. We'll have approximately 840 parking spots and we're taking safety and security of our guests very seriously.

Standard lighting for a parking lot is measured in candle lights, about one to one-and-a-half candle lights. So that's what you
would see at a typical mall. Here, we're going to have the minimum of six and could be as high as six-and-a-half candle lights across the entire parking lot.

It will be constantly patrolled by security. What you don't see here is we're actually putting a security tower in the middle to give guests a little extra assurance when they come visit us.

I don't want to ruin all of the surprises, but I'll show you one rendering from the inside here and give you a little taste of the interior. On this slide here, you can see the center bar which will be I guess kind of the first sight you'll see when you walk in the front doors and you'll see it's flanked by Historical Horse Racing games on both sides.

Now in this slide, you can see a general layout of the property. We forgot our laser pointer so I'll have to walk you through here. We'll go clockwise.

To orient you, the main entrance is at the center top of the screen. Can you see my mouse up there? Right up there. Just to the right, you have the smoking section. Right over here is the high limit games. Back here is a lot of
administration and back of the house area and the cage in the back center.

You have our full-service Rosie's kitchen right here on the left wall, and in the center as you saw the rendering, that's the center bar and right behind that very prominently located is the OTB betting simulcast.

This slide will give you a little taste of what the interior looked like as of last week. It kind of gives you an idea of the large scale of what it looks like on the inside.

Of note here is this picture in the bottom left corner, which is the simulcast wall right behind that center bar that I just described. I can guarantee you that when people walk in and drive by, they will have no idea that it used to be a Kmart, so this will be much, much nicer.

Now the next slide is some of the important dates. I won't go through all of them, but I'll touch on a couple key dates here. Twenty-four hour security begins at the site in about five days, followed by HHR game delivery the following day on the 28th of May.

We plan on having three invite-only days very similar to what we did at the New Kent and Vinton
locations. This will give us a little time with limited number of guests to make sure all the kinks are worked out and we have the best customer service that we're already known for.

The current opening date is towards the end of June and we'll finalize that as we get closer. So now, I will turn it over to John to walk you through some more.

MR. MARSHALL: Thank you, Aaron. I'd like to introduce today our general manager for Rosie's Richmond. He's with us today, Virginia native, Philip Harris. Would you please stand? With Philip today is the leadership team at Rosie's Richmond. If you could please stand. Thank you.

The executive director asked today that I share a glimpse of the current status of Colonial Downs in our quest for the rebirth of live racing at Colonial, so I've got a few images to share the current status.

The top row, I'll walk from left to right to talk about the evolution of the dirt track.

So first, we had a professional survey done, and secondly, our contractor had graded us to grade. We are at grade and base was exposed today with the first layer of cushion planned to go on
as soon as possible.

So we removed the former Standardbred surface, the limestone surface, and we're using it to repair shed roads, parking areas, areas around stalls and that work is underway today.

The more interesting process in the top right is the sifting of the former cushion where we are loading the former cushion in the sift machine and getting the fine, very important particulates from the former cushion which will mix into the new material to make up our new cushion, which is going to be composed of sand sourced locally from a quarry called Aggregate.

The other two-thirds of material will be brought to us from Maryland, which is the same cushion that is used at Laurel Park from our contractor, Stanley concrete.

The center row documents the burn of the turf course which happened about four weeks ago now, and the center picture is immediately following the burn, and to the far right is the turf course as it looked yesterday.

The bottom left, the tote board had been demoed and the steel is arriving for the new LED tote display today. Our panels are at port in
Norfolk today, scheduled to arrive next week and assembly will continue forward.

We also simulated with the VCU evac unit with their helicopter unit from Dinwiddie, Virginia which will service us in the event we were to need them. It is very important to us that we simulate with New Kent County and VCU to make sure we've got the pieces in place to respond in the event of that type of incident.

Work in the barn area is continuing, so we are renovating the top 500 stalls, the top seven barns first, and we will renovate through 14 incrementally as they become occupied. Work has continued in the dorms so that we've got clean, fresh dorms with functional bath houses as we open the stable area July 25th. So that's a glimpse of our track evolution. Work is moving forward as scheduled.

I've also been asked to share with you some partnerships that we've forged over the past several months within the industry. We all know to put on a first class race meet, it requires several partnerships and a lot of support; partnerships within the industry, partnerships specific to marketing live racing and also
partnerships related to distribution of content and signal. Those are the three categories that are going to guide our success.

We are proud to say today that Colonial Downs is the newest member of the NTRA, and our purpose for joining the NTRA is two-fold initially.

One, we want to join the national movement to promote Thoroughbred racing nationally; and two, one of our first orders of business with the NTRA will be application for the NTRA safety and integrity accreditation, which will happen synonymous with our inaugural race meet.

We'd like to note the considerable support we've been getting from the Jockey Club. Jim Gagliano personally has extended his mentorship to help guide Colonial Downs to the finish line for the reopening. So we've been getting some good tutorial on equine injury database, electronic vet records, Compass, and the new most modern race office technologies that we plan to employ at Colonial Downs.

We've also volunteered to the Jockey Club to be a bit of an incubator as it comes to recommendations related to the McKinsey study and the Jockey Club will be introducing first time
technology here at Colonial Downs to pilot and to
test, so that's a great industry outreach that we
feel very proud of.

Our associations with Equibase continue
traditionally as any other race track, but one
item to note is we will be one of seven race
tracks in North America using Equibase's GPS
timing technology. So the days of the eyes around
the racetrack are behind us.

We'll be using GPS chips in saddle pads and
gathering more data, more in-race data than
Colonial Downs has ever seen before, which should
translate into more information for betters, to
trainers and to owners on the performances of
their horses.

We've been in contact with Terry Meyocks at
the Jockeys' Guild, so we have the unfettered
support of the Jockeys' Guild and the country's
top jockeys who will be invited to ride at
Colonial Downs.

We also have a relationship with the NSA, as
we'll be hosting two live jump races each Saturday
at Colonial Downs. With the help of Dr. Allison
and Al, we were able to make contact with the
National Steeplechase Association folks who are
very supportive and we're working towards an exclusive festival in 2020 and beyond which will be a single-day event at Colonial Downs.

Our commitment to the Thoroughbred Aftercare Alliance has been well documented. The VHBPA had committed $15 per starter through the participants and Colonial Downs elected to match those $15 and we've got a great relationship going on with the TAA.

We also now will be participants with the Permanently Disabled Jockeys Fund with Terry Meyocks and the group to support and help fundraise for causes of permanently disabled jockeys.

On a local note, we have made contact with Keith Tweedy and Leonard Lusky on the Secretariat brand and we plan to celebrate the heritage of Secretariat and the Secretariat brand at Colonial Downs here in Secretariat's home state, obviously.

We've made a friend in Dream Catchers. Dream Catchers is a horse therapy center near Williamsburg, Virginia and they provide therapy for children with autism and disabilities. The stories you hear from Dream catchers of children speaking their first words on the back of a race
horse are very touching.

   Dream Catchers also provides services and therapies for veterans who come home and it's the horse, human touch, and we've become great supporters of Dream Catchers and great friends. So that's an industry perspective.

   From a marketing perspective, where we're going to get noticed, how we're going to get our word out is we've done an unprecedented marketing deal with the Daily Racing Forum through Jim Costas and his team. We will have ads and sponsorship in the Daily Racing Forum publications leading up to and through the live race meet.

   We will be printed in the p.m. edition of the west coast and the east coast editions. It's really hard to get coverage in every edition of the DRF and we were able to accomplish that thanks to Jim Costas and his team.

   We've made contact with America's Best Racing through the Jockey Club and Jim Gagliano. America's Best Racing is going to feature Colonial Downs in pod casts, in blogs, in the online vignettes that they use to educate the public on Thoroughbred racing. So America's Best is a
partner.

Also notable, the BloodHorse magazine. John Keitt, the editor and chief, had expressed interest in doing an exposé on Colonial Downs and the rebirth of Colonial Downs, which we plan to run in July.

It will be multiple stories that will tell the story of Colonial Downs from the very beginning from House Bill 1609 where we are today, to the first race in the starting gate on August the 8th. So Mr. Keitt has some plans in his journalistic mind in how to introduce this and we're very happy and proud to participate in that.

The Horse Racing Radio Network. Mike Penna and Jude Feld on Sirius radio. The HRN will be broadcasting live from Colonial Downs on several race evenings and Mike and Jude will be giving their commentaries and breakdowns of the cards and other news that's going on throughout the industry during that time of year, predominantly Saratoga and Del Mar.

At The Races with Steve Byk. Staunch supporter. We're working on an arrangement with Steve Byk to how we can sponsor and advertise on Off To The Races. Steve Byk has had us on Sirius
and XM with him in the past at the national HBPA convention most recently, so we're very involved with Steve Byk.

On a local note, The Racing Biz, Frank Vespe, we've been on several times and you all are no strangers to The Racing Biz and the coverage of the Mid-Atlantic.

Colonial Downs is a participant. Colonial Downs has been welcomed already before the first race entered the gate by The Racing Biz. These are our marketing partners and that's our pre-race marketing plan.

On a distribution front, International Sound will be conducting our race patrol and filming services and Roberts Communications will be our distribution network via satellite and internet streaming.

I'd like to also announce to you that we will be producing a signal in high definition from Colonial Downs. We have the ability to receive signals in high definition at Rosie's and Virginia Horseplay and we're proud to announce for the first time here that we will be broadcasting in the most modern technology high definition form.

High definition is a prerequisite to help your
distribution; most notably, NYRA and Fox Sports. NYRA and Fox Sports has a partnership with a national broadcast that we've been invited to participate in conjunction with Saratoga in alternation on Fox Sports One for national distribution through the NYRA Fox Sports network.

Also, NYRA is our content manager. It was confirmed this morning that where NYRA is distributed, Colonial Downs is distributed and we are expected to be available to 900 recipients. That includes secondary recipients in our distribution of our live signal.

We are also in discussions with TVG to be able to broadcast as many races as we can on the TVG Network, which is a buy-up option on Cox, Pinnacle and Xfinity here in Virginia and on many other cable networks across the country.

We're also going to be available on Dish Network. On the Dish Network channel 9705 and up through the Racetrack Television Network, RTN, a subsidiary of Roberts Communications.

Todd Roberts has been a great supporter of Colonial Downs and has come back. Aaron and I have met with Todd Roberts personally and his people and enlisted him for his optimal
distribution which he is affording by extending a hand. Of course this is all powered by AmTote as our wagering platform.

We're also proud to have a few comments on the team, the racing team. The names, the people, the experience that are making this all happen. Colonial Downs, I would say, is made up of the first female-led racing operation with Jill Byrne as our VP of racing operations and Allison DeLuca as our race secretary, both of whom have two life times of experience in horse racing.

Jill most recently from the Breeders Cup, Church Hill Downs racetrack and TVG. She has been assistant to the multiple Eclipse award Hall of Fame trainers and she has been an outrider herself and a gallop person in the morning herself, too. So she understands the business from beginning to end.

Allison DeLuca, currently race secretary at Tampa Bay Downs, has spent her summers at Churchill Downs and Keeneland in Kentucky, but now she has found a home at Colonial Downs as our race secretary.

Allison has been working on our condition book, our stake schedule, our stall application,
all those good things since the last week of March.

I'd like to announce here today for the very first time, our condition book will be available online tomorrow and it's at the printer today and will be hitting the mailboxes of horsemen across the country early next week.

The rest of the team, Jeff Wingrove, our racing operations manager, was with Colonial Downs before. He's with us now. Jason Wittler, our director of OTB operations, had been with Colonial Downs, Virginia Bets, with the VEA.

Ken Brower, our track superintendent, experience at Pimlico, Laurel and Canterbury Park. Harrison Young is our assistant track superintendent. Harrison comes to us from Bridlewood Farm in Ocala, the training center where Catholic Boy had grown and worked and matured to be a champion.

JD Thomas is track consultant, formerly with Colonial Downs and with the VEA, oversees the training center at Middleburg. Dr. Mick Peterson is our track surface consultant. Dr. Peterson, as you may know, heads up the University of Kentucky equine and agricultural program and has been doing
analytics on our surfaces to get us to the most optimal cushion that we can prescribe for Colonial Downs.

Tim Fredericks, turf irrigation consultant, can now add Colonial Downs to his résumé, including the NYRA tracks, Keeneland, Churchill Downs and Woodbine.

Caroline Gill returns as our horsemen's bookkeeper. Dennis Petrachelli, clerk of scales, has operated at Arlington Park and Tampa Bay Downs. Tony Iranno is our head starter from Tampa Bay Downs. Plus, he's bringing his crew of 12 starters, so we get 12 for one in that case. The entire team from Tampa Bay Downs.

Carlos Garcia, our stall superintendent, coming from Tampa Bay Downs, formerly at Laurel and Pimlico. Our track announcer, announced today for the first time, is Jason Beam. Jason Beam is the back-up announcer at Monmouth Park and has announced at Gulf Stream Park West, Portland Meadows and Emerald.

Merv Huber is our analyst and handicapper. Merv joins us from Churchill Downs, TwinSpires and Bet America. Last but not least, our PR consultant, Jim Gluckson. Jim Gluckson, his
current clients are Breeders Cup, NTRA, and he has got a long résumé including an Eclipse award, turf writer, multiple award honoree from the Turf Writer Association.

So this is the team. These are our partners when we head to the gate on August the 8th. Thank you.

CHAIRMAN VAN CLIEF: Thank you. That is a very impressive briefing. After two successful openings in New Kent and Vinton, you guys are obviously off to the races.

I can't help but be impressed just listening to this and looking at your PowerPoint presentation. Starting sort of at the end, I'd love to make some comments here.

It's obvious that you've put a great deal of thought and effort into every step of the way. In my book, this is a great management team. These are experienced individuals with excellent records, and if you look at the résumé that you just set forth, they've all worked for quality organizations run by quality people. So I think it sounds like a very strong team.

Your outreach to the industry with your association members is strong, and again, my
personal opinion is it's correct. Your marketing partners, your distribution partners. You have a great network already in the making. It's professional, it touches charities, it handles marketing, distribution, communications. It looks like you're set to go.

I am very impressed with what you've done here thus far and wish you all the luck as you move ahead. It doesn't sound like you need a lot of luck. Looks like you're doing a lot of things right. So I am very excited. I think it's extremely, extremely exciting.

MR. MARSHALL: Thank you.

CHAIRMAN VAN CLIEF: So thanks for all the effort you guys are putting in to making this work and doing it right. I know you're getting some credit across the industry and I think you deserve it. I think it will be fulfilling. So thank you for all you've done.

MR. MARSHALL: Thank you.

CHAIRMAN VAN CLIEF: Any further questions?

COMMISSIONER SIEGEL: I would just echo what the Chairman just said. One small question. Will you have a printed edition of the Daily Racing Form on race days?
MR. MARSHALL: Yes.

COMMISSIONER SIEGEL: Your predecessor had a machine. You put in your four quarters and it didn't work half the time.

COMMISSIONER NIXON: You can get them now.

CHAIRMAN VAN CLIEF: That's great. There was FedEx involved. I think they didn't want to pay FedEx.

MR. MARSHALL: Well, we have both options available now and today at the six OTBs, including the Rosie's and the Virginia Horseplay, you can buy the Daily Racing Form and the Daily Racing program publication today.

COMMISSIONER SIEGEL: Great.

CHAIRMAN VAN CLIEF: Terrific. That takes us, my fellow commissioners, to Tab Seven in your brochures today, which is the staff report and response to the voluminous application we all received last week, and I'm sure you all have absorbed all of that.

Mr. Lermond, do you want to give us a quick rundown of your staff report and hit the highlights for it?

MR. LERMOND: I'd be happy to, Mr. Chairman. As you said, this application was very similar to
the ones that we've received already. They're always well organized, require all of the information and easy to read if you read through it.

As far as the facility goes, it's going to have an occupancy of almost 3,000 people and measure 120,000 square feet. It will offer 700 Historical Horse Racing terminals and also with a separate simulcast area which you saw on the drawing earlier, which I think is going to be really nice and prominent.

It will have the same hours of operation as the other Rosie's. The restaurant will be similar to the other Rosie's, if not exactly the same, which I think is good to have that continuity from one Rosie's to the next.

I can tell you the people I have seen at the Rosie's that are open now are very happy with the food and service and machines and everything, so we just expect more of the same from this location.

They talked about the enhanced security in the parking; lot brighter lights, the tower in the middle. I think those are all very important. Might want to point out those were not things that
the Commission asked them to do. Colonial Downs decided to do all those things on their own.

We definitely applaud that and we appreciate all the cooperation that we've received from John and Aaron and their whole team throughout this whole process. It has been very smooth and just a pleasure to have a licensee such as Colonial Downs Group.

I would be happy to answer any questions the Commission has. I would just ask that when we approve this, Mr. Drewry has suggested that because there are two separate licenses, one for the satellite wagering facility and one for the HHR, that we do that in two separate motions, and the motion, you can just reference the two recommendations that appear on Page Five of the staff report as part of your motions.

CHAIRMAN VAN CLIEF: Thank you. Are there any questions for Mr. Lermond? David, I've got one. Just a request, really. On Page Three under the topic of security, you note that there will be some final details wrapped up with regards to the security plans and facilities and that there will be an inspection within 30 days prior to the opening.
Would you do us a favor and make sure that you provide each commissioner with a brief report as to the results of that inspection? I'm anticipating it will be positive, but just let us know pro or con that has been done.

MR. LERMOND: We'd be happy to do that.

CHAIRMAN VAN CLIEF: Okay. Great. Any other points? In that case, we need two motions. One to approve the satellite wagering facility and one to conduct pari-mutuel wagering on Historical Horse Racing at that facility. Both of these motions should come with the following provisos and I'll read these and ask that the motion include them verbatim.

Number one. The satellite wagering facility and pari-mutuel wagering on Historical Horse Racing shall be operated in accordance with all representations, plans and specifications as submitted in the application and as described at the Virginia Racing Commission's May 22, 2019 meeting, and the licensee shall not deviate materially from these representations, plans and specifications without the prior consent of the Commission or its executive secretary.

Number Two, the satellite wagering facility
and pari-mutuel wagering on Historical Horse Racing shall be operated in accordance with all applicable state and federal statutes and regulations, the regulations of the Commission and all local ordinances. So those two conditions will be included in our motion.

Do I have a motion to approve the wagering facility including those conditions?

COMMISSIONER REYNOLDS: So moved.
COMMISSIONER SIEGEL: Second.

CHAIRMAN VAN CLIEF: We have a motion and a second. Any further questions or any discussion? If not, please signify your approval by voting aye.

NOTE: The Commission votes aye.

CHAIRMAN VAN CLIEF: Any opposed? Thank you.
We need a second motion carrying the identical conditions to approve conduct of pari-mutuel wagering on Historical Horse Racing at that satellite wagering facility in Richmond.

COMMISSIONER NIXON: I have a motion.

CHAIRMAN VAN CLIEF: We have a motion.
Commissioner Nixon. Second?

COMMISSIONER SIEGEL: Second.

CHAIRMAN VAN CLIEF: Thank you, Mr. Vice
Chairman. Any further discussion or questions?
If not, please signify your approval by voting aye.

NOTE: The Commission votes aye.

CHAIRMAN VAN CLIEF: Any opposed? Thank you.
The motion is passed and licenses are granted accordingly. Thank you all very much for being here and it's a particular pleasure to meet the new management team at Rosie's Richmond. Thank you all for being here this morning.

COMMISSIONER REYNOLDS: Congratulations.

CHAIRMAN VAN CLIEF: Okay. We have two special presentations to wrap up this meeting and we're going to hear today from two experts in their fields. Curtis Linnell, who is vice president of the Thoroughbred Racing and Protective Bureau, and Joe Rudisill, who is the Commission's HHR compliance specialist. I will throw it to Mr. Lermond to do a little more in the way of introductory remarks.

MR. LERMOND: Thank you, Mr. Chairman. I'm very pleased today to have Curtis Linnell here with us. I think I've known Curtis for probably at least 20 years, maybe a little bit longer.

Curtis, I like to call him the pari-mutuel
wagering guru of the industry. I've asked him to start his talk by just going into some detail about what he's done to get to this point, but I can tell you Curtis is very well qualified and a very smart individual and the TRPB was retained by the Commission to be its integrity auditor as outlined in the regulations and we're very happy.

I thought it would be great to get Curtis here today to give the Commissioners and everyone else a little taste of what we do and what they do to ensure the integrity of the terminals.

CHAIRMAN VAN CLIEF: Thanks, Dave. I've had the pleasure of working with Curtis in the past, too, on wagering integrity issues and the only thing I would ask him today since he knows so much more than rest of us is to try to remember you're talking to laymen here. Thanks for being here, Curtis.

MR. LINNELL: Thank you very much for having me and thanks for inviting me. I really appreciate this opportunity and congratulations to the industry and the Commission in Virginia. This is a great renaissance and we look forward to seeing some great horse racing.

So Chairman Van Clief, Commissioners, the
Executive Secretary, we have the contract with the Virginia Racing Commission for Historical Horse Racing.

I should say at the outset if I appear nervous, it's because courtrooms always make me feel that way. I did wear my Derby jacket. I have very few times to show it off so I have it.

Let me just start by mentioning the digital tattooing because that came up before. Digital tattooing is digital documentation of horses using high-resolution photography that will be indexed to the microchip number of the horse and available for viewing by the paddock identifier.

We're in the process right now of retraining all our tattoo technicians across North America. By the time the Colonial Downs meet occurs, we will be both lip tattooing and digitally tattooing. We will end lip tattoos at the end of this year in January. In 2020, we will only be doing digital tattooing.

We're excited about the process. The executive secretary, Mr. Lermond, mentioned the ARCI rule. That's in place for all two-year-olds of 2020, so that starts immediately.

Okay. Let me get into Historic Horse Racing.
I did an informal presentation. I didn't think it would be up on a big screen in front of everyone; more for the Commission's benefit. Let me just quickly give you some of the topics.

TRPB history, for those that are unfamiliar, my background and the wagering integrity unit, Historical Horse Racing, the inception and then of course our role with the Commission.

I know this isn't allowed, but the bailiff may throw me out. Okay. The TRPB has a great history formed by the Thoroughbred racing associations.

In the midst of a scandal, a scandal of horses being swapped and the involvement of organized crime in horse racing at the end of WWII, it was an exciting time and the wisdom of the Thoroughbred Racing Association decided they needed a security arm. They went to the FBI, J. Edgar Hoover, who of course always was good to give advice when it came to security, and J. Edgar Hoover had a former special assistant by the name of Spencer Drayton, and he thought it would be excellent.

I think that was because Spencer Drayton left the FBI and was running a newspaper in Chicago at the time and Spencer Drayton became the first
executive vice president of the TRPB and started
the organization modeled exactly after the FBI in
the 1940s. Unfortunately in the 1980s, it still
looked like the FBI in the 1940s in some regards,
but we've updated that.

So 70 years of lip tattooing. The goal of lip
tattooing was central to horse integrity for the
TRPB and still continues and we think with the
evolution of digital tattooing we have a better
system.

Certainly agents were hired across the
continent. The first horse racing database of
information was developed and background checks
and integrity, and again, that's central to what
the TRPB still does.

Okay. The evolution of the TRPB for 70 years.
I won't go year by year. Let me just jump forward
to the wager integrity unit. In 2002, the
organization launched an investigation into the
tote system security and that was timely for both
the industry and for myself because I was hired as
a consultant to do that investigation and we were
starting that in the fall of 2002.

Of course exactly at that time,
coincidentally, there was a major scandal for the
Pick 6 with Breeders Cup at Arlington Park. Bell Poney won at long odds and somebody had hit the Pick 6 multiple times and a number of people screamed foul.

We did the initial investigations and interviews of the tote company and the individuals involved and were first to be able to submit a report and the brand new NTRA wagering systems project and task force was developed, a wagering integrity alliance, and that launched the era of horse racing deciding that wagering was central to its security and integrity and certainly we developed that capacity in the TRPB ever since.

So we started the betting analysis platform in 2006 and that is the premier wagering analysis and security platform in the industry worldwide. We've consulted to many international organizations who wish to duplicate that platform and I think we've helped everyone along.

In terms of what we've done with that expertise is leveraged it. John Marshall was great to point out all the industry partnerships that Colonial Downs has. The industry really is an industry. It's a meeting of not just horses and jockeys and individuals, but a meeting of
organizations that can leverage expertise
together.

That's what we have with the TRA wagering and
technical committee, is a membership of 35 people.
We have the opportunity to chair that group and we
work on common technical and technology issues in
the industry and develop standards.

We also have an international tote protocol
working group, which I have the opportunity to
coordinate. Just like the chairman talked about
very technical things, so do tote developers, and
we try to ignore them talking about floating point
precision and certain calculations, but we do take
that as an industry group and move with tote
protocols to make sure that security and integrity
are central to those protocols and service the
clients, which is the racetracks and the
commissions, to have confidence in the tote
systems that we have today.

We have a number of services contracts with a
number of commissions. I won't take you through
those, but we're very pleased with the
relationship we've developed with the Virginia
Racing Commission and we look for a fruitful
relationship going forward.
This is just a snapshot. Again, I won't get into the technical parts of the wagering analysis and security platform. Again, it services all TRA tracks and it services a number of various commissions through services contracts and we're very proud of it.

Okay. Historical Horse Racing, first referred to as Instant Racing, started by the Oaklawn Jockey Club and AmTote International formed a company called Race Tech.

They developed a game in the early part of the century called Thoroughbred Mania in a format which they called Instant Racing, which was based on pari-mutuel betting on historical races served up from a library.

They did this in Arkansas and invited the TRP right from the outset. Right from the development of Instant Racing to consult with Race Tech and start to devise statistical tests to talk about the integrity of that product and how it matched pari-mutuel take-out, handle and commissions. So we are in the outset of Instant Racing.

The TRPB reached out and contracted with the head of the University of Delaware mathematics department. We continue that relationship with
very senior people. We have a consultant right now by the name of Dr. Trout, who was the former head of the math department at Rutgers University in New Jersey and he's our lead consultant to analyze and litmus test all of our mathematical statistical tests for Historical Horse Racing.

So we became, for lack of a better word, the virtual stewards of Historical Horse Racing. The ones who were there to watch over what happened when nobody else was watching because this is a very automated structure and set-up of taking races from historical races from libraries, masking the particular information on the horses and riders and sending this out to the customers to be able to make pari-mutuel bets on the races.

Okay. Currently, we have three clients in Historical Horse Racing. That initial Race Tech contract was then later purchased out from the Oaklawn Jockey Club by AmTote International. We still do an independent third party audit for AmTote International as part of that legacy contract, but our other two clients in Historical Horse Racing are racing commissions, and again, all of our results are independent.

So what do we do for Historical Horse Racing?
And that's really the question. I listed six items here, and I won't go into detail because the audit itself is for the visibility of the Racing Commission, for the staff, and to have that information internally so they can use it for reporting purposes and integrity.

In general, we analyze results to ensure a fair distribution of race selection, so the race selections that arrive to customers for betting represent not the same races repeatedly over and over. They don't represent a pattern of races over and over, but a fair distribution of races that the customers can then bet on.

Whether they choose to use automated betting tools or they choose to handicap and bet those races directly, all the distribution of races are fair.

So a cross-section of race results, and we do a number of statistical tests to make sure that the race selection is fair from the library.

We also perform on-site play of Historical Horse Racing games and record the track, the race, number, the order of finish and we compare that against official charts. So we make sure that the races that are served up to customers are the ones
that are supposed to be served up and the results comport to those actual races that were run in the past.

Again, the customers don't know because they're masked, the horse's name and the jockey's, but somebody has to verify that those races are in fact the ones that they're betting on.

We also analyze betting on large scales looking for abnormal patterns of play. We don't just do this for Historical Horse Racing. We do this for large sections of the North American pari-mutuel network, for all pari-mutuel activity where we look for abnormal patterns of play and abnormalities of payouts. We take those same tool sets and apply those to pari-mutuel results for Historical Horse Racing.

We store and database all Historical Horse Racing play and activity. All of it. Not a sampling, not a portion, but actually all of it. Creates a tremendous amount of information.

Of course every play that a customer draws up is comprised of three races, so the customer selection, the race result, the time of that. There's a tremendous amount of information associated with every play in Historical Horse
Racing. We database and record all that.

Of course we produce management reports monthly for the staff, the executive secretary and his staff of the Racing Commission, and have those on file for other integrity tests. We do that quarterly and also semi-annually and then work with the Commission for a member of customized reports.

There's another organization involved that the executive secretary has asked me to mention. I don't represent Gaming Labs International, however, they're also involved with Historical Horse Racing and they do the terminal-level work on code and digital signatures to make sure that the security at the terminal level is in place.

We don't do as the TRPB. In comparison, terminal-level activity, we do pari-mutuel analysis. Everything we do has to do with the horses, the races, the pari-mutuel handle, the commission, the takeout, the payout, the breakage. Everything to do with Historical Horse Racing as a pari-mutuel activity on horses is our purview.

So it's a nice separation to have Gaming Labs International doing the physical work on the terminals and ensuring that the code and the
digital signatures and ourselves doing the pari-mutuel and racing aspect that we know.

We're also able to work with the Racing Commission very closely to produce customizable reports. We've done one in the past called Off Hours of Operation. That was a nice feature to have. We also have done reports on racing libraries to make sure that races were not in the library that had things that we just saw.

For example, the Derby. Disqualifications or scratches that weren't reported in the results. So we're able to sift through the library of races to make sure that all those, again, comport to the nature of the games played in the customers' name.

We've also done major jackpot reports, what we call in horse racing payouts, major payouts, and we looked at the activities leading to those major payouts.

This is a picture of TRPB offices. Very few people ever get to see us, but we certainly welcome any members of the Commission and staff to come and join us in Fair Hill to come and look at the data shop and analytical operation. And again, we'll be on site for every OTB and Historical Horse Racing OTB that opens in the
state in the Commonwealth of Virginia, and we'll also be periodically visiting those and doing field tests and working with the Commission to make sure that they have another set of eyes on the operation of Historical Horse Racing. Thank you.

CHAIRMAN VAN CLIEF: Thank you.

MR. LINNELL: Please, any questions.

CHAIRMAN VAN CLIEF: Any questions for Mr. Linnell?

COMMISSIONER MILLER: This presentation is beyond my questions.

MR. LINNELL: I hope that's a good comment.

CHAIRMAN VAN CLIEF: Curtis, thank you very much. Nice to see you again and thank you for keeping that totally understandable.

MR. LINNELL: You're welcome.

CHAIRMAN VAN CLIEF: Excellent presentation. Thank you. Mr. Lermond, want to induce Mr. Rudisill?

MR. LERMOND: Sure will. Thank you. At this time the second speaker that I've asked to present today is Mr. Joe Rudisill. He was hired by us back in the fall when we first started getting the applications for the HHR facilities. Mr. Rudisill
has an extensive background in security surveillance.

I'll let him expand on that a little bit more, but I would just like to say we're very happy to have him. He has proven to be a very big asset to the Commission and to me personally and I thought, again, it would be nice to have him before you today and just talk a little bit about what he does as far as the regulation of the HHR.

CHAIRMAN VAN CLIEF: Welcome.

MR. RUDISILL: Mr. Chairman, Commissioners. My name is Joe Rudisill. I hooked up with Dave in the fall. A little background on myself. I have 40 years gaming experience, 25 years in an executive leadership role, and I was the general manager at Dulles Park when we opened the HHR machines in 2012, and I -- the Red Mile with 900 games in 2015. I was the director of safety there.

I was hired by Dave to review security plans and surveillance plans that were given to us by Colonial Downs Group, and so they brought me in and I reviewed the security for the properties and reviewed standard operating procedures, minimum internal controls and the security surveillance cage, the HHR games and account rooms.
All HHR operations -- the reason security and the SOPs and the internal controls are -- all the HHR operations are based on the minimum internal controls and the standard operating procedures.

If you see violations of these controls, then you know something is probably going wrong and up to and leading to theft and money laundering and things like that, so it's very important that we included what we wanted in the security plans and surveillance plans and in all internal controls and SOPs.

David and I started visiting the sites in January. Colonial Downs, Vinton, Richmond and Hampton were all construction sites at that time and two of them still are.

Until recently, we were monitoring security and surveillance progress, making sure Commission presence was there when machines arrived. We went and visited the sites frequently. We actually visited them yesterday.

We went to Richmond and saw the construction site there. We drove over to Hampton and they're pretty far behind, and we went to Colonial Downs to see our friends there and from what I observed so far, Colonial Downs Group is running a top
notch operation here. They really are.

Sparing no money on systems, which is big in the gaming industry. Surveillance systems, the HHR system they put in, the win system, the key watchers with restricted keys and things that don't leave the building to lead to violations.

They've been forthcoming and transparent with us, providing information to the VRC.

The successful openings I think at Colonial Downs in Vinton have shown us that the CD management group knows the gaming business and are interested in seeing things done the right way.

So we have had no problems. They've cooperated with us every step of the way. All the information that we've asked for we've received timely. So that's where we're at. Ready open two more.

CHAIRMAN VAN CLIEF: All right. Thank you. Any questions for Mr. Rudisill? If not, Joe, thank you very much. We're glad to have your experience and expertise as well.

MR. RUDISILL: Thank you.

CHAIRMAN VAN CLIEF: Thanks for joining us.

MR. RUDISILL: Thank you.

CHAIRMAN VAN CLIEF: Okay. That brings us to
that point in the meeting where commissioners are free to make comments. I probably already said too much, but other than again to say how exciting this stage of the game is and what a great job it looks like everyone is doing and how great it is to be up and running. I'm very, very excited. Would anyone else like to make comments?

COMMISSIONER NIXON: Different subject. I would like to congratulate Dr. Daniels on a nice win on Preakness day. So looks like he will fit in well at Colonial this summer.

CHAIRMAN VAN CLIEF: Excellent.

DR. DANIELS: Me, too. We'll see.

COMMISSIONER REYNOLDS: I'll just be brief. I want to thank the horsemen and all those in Colonial Downs and everybody who got together. It has been a long time since the dark days of 2014. When I see, I guess it was Frank and Larry walked in together or Frank and Prentiss, I can't remember, but it's rare that I see two people walking in together with smiles on their faces. I just want to commend you all for all you've done.

I just sit up here and think back and I think of our court reporter who has to write all this
stuff down so quickly and how she does her job is amazing, but it also made me think back to 2014.

I'm not a glutton, but I'll never go back and read all of the transcripts again, but if you read the transcripts from 2012, 2014, all the way through up until today, I think these last few meetings, I'd gladly go back and read those transcripts because they're filled with a lot of promise and great news, and I just want to congratulate all of you all for your hard work.

I also want to congratulate and thank Dave Lermond and his staff, because I know if they thought they were busy before, you are uber busy now, so I want to thank you all. That's all.

CHAIRMAN VAN CLIEF: Mr. Vice Chairman.

COMMISSIONER SIEGEL: I'm going to just again echo everything that has been said. I'm excited about this opportunity and excited about what is open and what is to be open and look forward to August 8th.

CHAIRMAN VAN CLIEF: Excellent.

Commissioner Miller?

COMMISSIONER MILLER: Well, Mr. Chairman, I never know when it will be my last meeting, so if I'm not back again, I do want to take this
opportunity to put on the record that I highly commend all of you, all the horsemens groups and Colonial Downs and everyone involved for all the great work that you've done to revitalize racing in Virginia and contribute toward the future good economy in Virginia, we hope.

I wish all of you luck and I hope I'm still on the Commission when the live racing starts at Colonial Downs, because when I first came on the Commission in 2007, of course I had a break with a different governor, but that's another story.

Anyway, I'm looking forward to that opening race day in August. Live racing again at Colonial Downs was a goal for many years now, and I do want to commend all of you. In case I do not come back, good bye.

CHAIRMAN VAN CLIEF: We look forward to you being there with the rest of us no matter what. I hope we'll all be there. Thank you all very much.

We will not engage in a closed session today, but I would before we adjourn like to set the next meeting. I think it works on everybody's calendar for a July 10th meeting, which I hope, Mr. Lermond, will be here in this courtroom at ten a.m. on the 10th of July.
MR. LERMOND: Yes, sir.

CHAIRMAN VAN CLIEF: Okay. We'll set the meeting accordingly, and with that, I need a motion to adjourn.

COMMISSIONER SIEGEL: So moved.

COMMISSIONER REYNOLDS: Second.

CHAIRMAN VAN CLIEF: Any opposed? Thank you all and thank you very much. Have a good day.

NOTE: The meeting of the Virginia Racing Commission is adjourned at 11:25 a.m.
CERTIFICATE OF COURT REPORTER

I, Sandra G. Spinner, hereby certify that having first been duly sworn, I was the Court Reporter at the meeting of the Virginia Racing Commission at the time of the hearing herein.

Further, that to the best of my ability, the foregoing transcript is a true and accurate record of the proceedings herein.

Given under my hand this 27th day of May, 2019.
